Important information/forward-looking statements

This report contains forward-looking statements as defined in the United States Private Securities Litigation Reform Act of 1995. Words such as “believe”, “anticipate”, “intend”, “seek”, “will”, “plan”, “could”, “may”, “endeavor” and similar expressions are intended to identify such forward-looking statements, but are not the exclusive means of identifying such statements.

By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances and should be considered in light of various important factors. While these forward-looking statements represent our judgments and future expectations, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from our expectations. The key factors that could cause our actual results performance, or achievements to differ materially from those in the forward-looking statements include, among others, changes to IFRS and the interpretations, applications and practices subject thereto as they apply to past, present and future periods; ongoing and future acquisitions, changes to domestic and international business and market conditions such as exchange rate and interest rate movements; changes in the domestic and international regulatory and legislative environments; changes to domestic and international operational, social, economic and political conditions; the occurrence of labour disruptions and industrial action and the effects of both current and future litigation.

We are not under any obligation to (and expressly disclaim any such obligation to) revise or update any forward-looking statements contained in this report, whether as a result of new information, future events or otherwise. We cannot give any assurance that forward-looking statements will prove to be correct and investors are cautioned not to place undue reliance on any forward-looking statements contained herein.

Operational update
Ongoing investment in quality local and international content

Highlights over the past 6 months:

- Big Brother NAIJA: Record 240m votes cast for latest season
- Survivor SA: 36% increase in ratings vs prior season
- THE RIVER: Nominated for International Emmy for best telenovela, on-sold to FranceTV
- Critically acclaimed international content: THE RIVER

First local co-production:

- TRACKERS: Everyone leaves a trace

Compelling sports offering:

- Showmax: Launched sport on Showmax
- Final season of Game of Thrones attracted record views
- Sports viewers benefit from AFCON and Rugby World Cup

New GE channels launched:

- THE HERD: Winner of Seoul International Drama award 2019
- New WWE pop-up channel

New local content produced:

- >54 000 total hours in content library
- 1 900 hours of local content produced to date (1)
- 43% local content as % of GE content spend (1)

Critical acclaimed international content:

- Chernobyl
- Loudest Voice

Sport offering:

- Sports viewers benefit from AFCON and Rugby World Cup
- Compelling sports offering

Notes:

(1) Content production subject to seasonality, therefore these numbers are not an accurate reflection of run rate for full year FY20
SA: Focus on growth, retention & efficiencies to support margins

**Drive mass market growth**
- Sustained growth in mass segment
  - net additions 315k(1) YTD
  - +9% HoH and +19% YoY
- Good traction in Access despite first price hike (+6%) since launch
- Healthy growth in Family bouquet (+28%) as strong content offset impact of higher pricing (+6%)
- Strengthened distribution channel by renewing agreement with PEP (STBs and payments)

**Increase retention**
- Showed all 48 Rugby World Cup matches on Premium
- Up-selling of Compact subscribers drove growth in Compact Plus and benefitted ARPU
- 3 new channels to be launched in November + retained A&E Lifetime and History channels at lower cost
- Increased number of Explora PVRs connected to the internet by 18% YoY, driving better customer experience and reduced churn

**Maintain operational excellence**
- Cost savings from recent launch of new HD decoder (30% lower cost) and prior year launch of Explora 3A PVR (15% lower cost)
- Improved operational efficiencies:
  - Discontinued Select and Portuguesa bouquets (<0.5% of the overall SA base)
  - Restructured customer care operations to a more flexible and cost-effective model

(1) Defined as all subscribers that have an active primary/principal subscription within the 90 day period on or before reporting date. Note: our primary metric for reporting subscribers has changed effective 1 April 2019 from active at the reporting date to 90-day active date. Note: our primary metric for reporting subscribers has changed effective 1 April 2019 from active at the reporting date to 90-day active date.
(2) Premium includes Premium and Compact Plus bouquets; mid market includes Compact and Commercial bouquets and mass market includes Family, Access and Easyview bouquets.
(3) Price increases represent the weighted average increase per segment, based on the number of subscribers at the effective date of the increase (1 April of each year).
(4) Active days considers all subscribers that were active at any point in the last 12 months, and measures the average number of days that the subscribers were active in the period out of the total days they could potentially have been active.
(5) ARPU calculated by dividing average monthly subscription fee revenue for the period by the average number of 90-day active subscribers at the beginning and at the end of the period.
RoA: Focus on sales and local content to seize market opportunity

**Drive mass market growth**
- New initiatives to target remaining 16m addressable market\(^{(1)}\):
  - Expanded points of presence in under-served locations (e.g. added 300 points-of-sale in Nigeria YTD)
  - Introduced sales automation tool to optimise sales performance
  - Adjusted commission structures to support improved customer retention and drive up-selling

**Increase local content investment**
- Strengthened local offering by adding relevant free to air channels (FTAs) onto platform
- Signed first, exclusive local content payTV deal – Clouds Plus in Tanzania
- Launched new kids channel (PBS Kids)
- Leveraging existing content, e.g. popular SA drama *The River* currently being customised for Kenya

**Other operational highlights**
- New HD decoder ~30% cheaper
- Driving efficient customer services:
  - *MyDStv* and *MyGOTv* app now in 7 markets, >1m downloads
  - ongoing roll-out of Whatsapp self-service (now in 5 markets)
- Gained 20% more channel capacity through upgraded DTT head-end compression

---

\(^{(1)}\) Based on 27m addressable market less 10.7m 90-day active subscribers

- No price increase implemented |
| Kenya    | -4%                    | • Price down campaign already showing results  
- 16% growth YoY in DTH subscribers | • Competitive pressure at lower end of DTT market (GOtv Lite)  
- Recovery plans in place and being rolled-out |
| Zambia   | +2%                    | • Maintained growth for most of the reporting period, despite challenging environment | • Power outages of >10 hours per day impacted seasonal reconnections (lost 13% active subs in Sept)  
- 24% fx depreciation YoY |
| Angola   | +4%                    | • Introduced Familia bouquet  
- Put through 24% price increase with limited subscriber impact | • Continued currency depreciation (34% YoY)  
- Liquidity constraints (~USD42m trapped, but slowly extracting cash) |
| Zimbabwe | -31%                   | • 150k subscribers⁽¹⁾ still active (320k 1H FY19) | • General economic collapse:

OTT: Continuously improving user experiences

Strategic objectives

- More users: +48% YoY monthly active users\(^1\)
- Watching more often: +68% YoY play events\(^2\)
- For longer: +19% YoY average hours watched\(^{1,3}\)

Operational update

- Launched localised version of Showmax in Nigeria
- Also launched mobile-only Showmax in Kenya and Nigeria
- Launched sport on Showmax (beta)
- Enhanced recommendation engines
- Improved content discovery functionality
- Rectified login authentication challenge

DStv Now UI updates

1. Improved information & imagery
2. Personalised profiles (up to 6)
3. Watchlists

(1) Measured as at 30 September YoY
(2) Measured as the total play events for 1H FY20 vs 1H FY19
(3) YoY increase relates to Showmax viewership only as DStv Now data for comparative period not available
Irdeto: Adds critical value to group, expanding into new areas

New customer wins in India (DTH) and USA (OTT) underpinned revenue growth

Major OEM ships first set of vehicles embedded with Irdeto technology

Margin expansion supported by effective cost management (SG&A and staff costs)

Continue to roll out innovative solutions e.g. forensic watermarking which supports faster piracy detection on live streams

Also benefitted from favourable product mix (i.e. more software sales) - likely to normalise 2H

Growing new revenue contribution

E.g. game security subsidiary Denuvo – fast growth off a very small current base

Traction in anti-tamper & anti-cheat

Benchmark crack-free release window

Fast and easy implementation

Cross-platform solution

Service protects any game type

Group
- Challenging comparatives due to non-recurrence of FIFA World Cup (FWC), mainly impacting RoA

South Africa
- Benefit of 7% subscriber growth offset by:  
  - changing subscriber mix affecting ARPU  
  - mass market price increases not fully offsetting flat Premium pricing

Rest of Africa
- Growth impacted by:  
  - macro-economic headwinds and power interruptions in Zimbabwe and Zambia impacting subscriber demand  
  - localised pricing decisions, i.e. flat prices in Nigeria, price downs in East Africa (Sept) and price increases in Angola, Zambia and Ghana
1 | Topline growth despite tough environment

Revenue by business segment (ZARbn)(1)

Revenue by type (ZARbn)(1)

Technology
- Strong growth off the back of key customer wins and new projects with existing customers
- Also benefitted from R120m special once-off project revenue that will not recur in 2H
- Total Irdeto revenues amounted to R1.8bn (inter-group revenue of R896m eliminated upon consolidation)

Advertising revenues
- Impacted by macro-economic environment and one-off prior year events

Other
- Loss of sub-licencing fees (mainly sport) in SA due to financial difficulties at SABC (~R50m in 1H but to increase in 2H)
- Lower event-driven hardware sales in RoA (~R50m)

- >80% of overall cost base is fixed
- Increased operating leverage to 6pp through tight cost controls
- Cost savings ambitions for FY20 on track, with key focus areas:
  - set-top boxes: benefitting from consolidated supply and lower box costs
  - content: increased local content investment
  - staff: right-sizing of customer care division
  - other: savings from digitisation programmes, platform efficiencies, contract renegotiations etc.

South Africa margin broadly stable ~30%
- Decline in trading profit driven by:
  - cost of 3 major sporting events (content plus marketing) during 1H (i.e. Cricket World Cup, AFCON, Rugby World Cup)
  - R78m once-off restructuring costs in customer care
  - R101m investment in engineering capacity for Connected Video, previously funded by Naspers

Rest of Africa contributed positively to group margin expansion through R747m (R1.2bn organically) in reduced losses

Technology benefited from revenue growth combined with tight cost control

2 | Rest of Africa turnaround remains on track

RoA trading loss bridge (1H FY19 – 1H FY20, ZARm)

- Reduced organic trading losses by 73% YoY:
  - R560m savings on event-driven decoder subsidies and content costs
  - subscriber wins resulted in incremental revenue growth of R409m
  - other savings of R183m driven by cost control
- Currency depreciation in certain key markets narrowed improvement to 47% YoY:
  - Angola: R135m loss due to 34% currency decline
  - Zambia: R125m loss due to 24% currency decline
  - Other currency losses amounted to R60m, 56% of which related to Ghana (14% currency decline)
  - R85m negative impact of translating RoA business from USD to ZAR for reporting purposes (ZAR 8% weaker vs USD)

  - 1H FY19: 371

- Technology: +37%
  - 1H FY20: 3 076
  - 1H FY19: 2 849

- YoY growth negatively impacted by additional 5% allocation in MCSA to PN as part of MCG unbundling, resulting in an increased minority shareholding

- MCG’s effective holding in MCSA changed from 80% (1H FY19) to 75% (1H FY20) – following the PN flip-up, it will be 76.4% going forward

- Increased contribution from business segments amounted to R363m:
  - Technology: +R281m due to strong operating performance
  - RoA: +R309m due to narrowing of losses
  - SA: -R227m due to lower trading profit

- Free cash flow supported by:
  - increase in cash EBITDA driven by improved operating performance
  - normalisation of decoder inventory (FWC investment in 1H FY19)
  - programme and film rights inflows due to prior year pre-payments

- Gains partially offset by:
  - R745m in non-recurring cash remittances extracted from Angola in prior period
  - R252m in other items, which include:
    - higher 3rd provisional tax payment required for SA
    - increased transponder lease payments driven by FX movements
    - working capital outflows on trade and other payables

- Capex remained stable at R275m

---

(1) Free cash flow defined as trading profit + depreciation & amortisation + non-cash adjustments – change in net working capital – cash taxes – capex – transponder finance lease repayments
(2) Angola was converted from an agency to a subsidiary in Feb 2019 and is now consolidated (i.e. cash remittances no longer occur through working capital)
(3) Relates largely to tax payments and foreign exchange impact on transponder lease payments

- 80% of cost base is fixed
- **Content costs increased** 6% YoY due to:
  - Cost of 3 major sporting events (AFCON, Cricket World Cup, Rugby World Cup) in this period, net of savings from prior year FWC
  - Impact of new EPL (English Premier League) contract (effective only 2 months in 1H FY20, to impact fully in 2H FY20)
  - Addition of Newzroom Afrika channel
- **Hardware costs** declined 21% YoY due to non-recurring FWC investment and STB cost savings in 1H FY20
- **Sales & marketing costs** declined 7% YoY mainly due to different marketing strategies around specific events
- **Staff costs** increased 8% YoY due to expenses related to the customer care restructuring in SA – the impact of these costs should be largely offset into 2H FY20
- Following the separation from Naspers, the nature of certain costs changed e.g. we no longer pay a management fee to Naspers (historically included in Other costs), but now carry a larger corporate staff complement in Staff costs
- **Other costs** (IT, administration, maintenance and general overheads etc.) declined 13% YoY due to tight cost controls and efficiency gains

YoY organic trading profit growth accelerated from 14% to 33%

South Africa trading profit impacted by:
- content costs related to specific events (Cricket World Cup, Rugby World Cup, AFCON)
- R78m in voluntary severance packages (VSPs) paid out as a result of the customer care restructuring
- R101m in additional Connected Video engineering costs

Rest of Africa benefitted from:
- cost savings on decoders, content and marketing associated with one-off prior year events, and
- strong improvement in operating results

Technology profits increased 4x due to:
- contract and project wins,
- one-off project revenue of R120m in 1H FY20
- tight cost controls

[1] As reported in the interim financial statements
[2] Calculated after adjusting reported values for: (1) changes in FX rates and (2) M&A activity
Business seasonality: typically higher opex, lower margins in 2H

- Trading profit in second half of the year generally lower than first half
- Largely driven by seasonality in opex, including:
  - higher content costs associated with the football seasons in Northern Hemisphere
  - higher sales and marketing costs linked to Festive Season/Easter Holiday campaigns
  - higher STB subsidies associated with the above
- Technology segment likely to report less favourable revenue and margin mix in H2 due to the positive impact of non-recurring project revenue in 1H FY20
- Some offsetting SA dynamics anticipated in 2H FY20:
  - Cricket World Cup, AFCON, and part of the Rugby World Cup won’t recur 2H
  - savings from customer care restructuring to benefit 2H
  - additional Connected Video engineering costs already in 2H base

• Hard currency input costs (46% of base) consist mainly of:
  – international sport and GE content rights
  – satellite transponder leases
  – set-top box purchases

• South Africa:
  – hedge USD-denominated costs (some EUR & GBP too)
  – hedged up to 36 months out

• Rest of Africa:
  – USD-denominated revenue (8%) not hedged
  – non-USD cash remittances are fully hedged in markets where feasible (i.e. FECs available at reasonable cost)
  – this equates to ~70% of overall RoA revenue
  – implies that only ~22% of revenues are not hedged
  – RoA hedged markets are covered 12 months out(5)
  – Zambia and Ghana currently not hedged as rates not economical (in accordance with hedging policy)

• Irdeto:
  – Earns primarily USD revenues
  – Non-USD operating costs hedged out 12-24 months

---

(1) Refers to ZAR and local currencies in RoA
(2) Relates to subscription fee revenue only and is shown as a proxy for cash flows, the latter being hedged
(3) This represents 'gross' cover taken out on SA foreign currency costs – from a group perspective, though, part of these costs are recharged to RoA and these recharged costs are hedged back into USD as that is the RoA functional currency
(4) Hedging cover in Zambia and Ghana <100% due to decision not to hedge in these markets given uneconomic forward rates (in accordance with hedging policy). In certain instances, hedging cover can exceed 100% as it is based on forecasts
(5) All RoA hedged markets are covered 12 months out, except for Nigeria, which is 13 months

- **Payables & accruals** - outflows driven by improved payment cycles and settlement of creditors, payment of annual bonus incentives and other seasonal factors
- **Programme & film rights** - movement driven by contractual GE prepayments in 1H FY19, as well as timing differences between production costs and associated amortisation
- **Inventory** - outflow due to investment in decoder stock, typical of seasonal push into H2, notably in RoA (1H FY19 outflow due to investment in FWC)

- **Low capital intensity** due to fully invested infrastructure

- **RoA:** 1H cash taxes as % of revenues seasonally lower given larger 2H settlements to most RoA tax regimes – anticipate normalised full-year rate
- **Technology:** Statutory tax rate of 25% largely offset by losses in RoA due to fiscal unity structure

(2) Free cash flow before M&A and dividend payments
Basis of preparation of consolidated interim financials

**Accounting policy**
- Prepared in accordance with IAS 34
- Moved from combined as required for listing to consolidated financials. No change in financial figures
- Adopted IFRS 16 Leases from 1 April 2019: R0.7bn balance sheet impact, but no material income statement impact. Comparatives not restated.

**Going concern**
- Management of the Group has reasonable expectations that MultiChoice has resources for the continued operation of the business as a going concern

**Taxation**
- Historically, entities filed separate tax returns, incl. South Africa
- All entities to continue to file separate tax returns
- Dutch entities are included in a fiscal unity structure and file a consolidated tax return
  - Profits and losses to be pooled within the fiscal unity

**Intercompany**
- Transactions with Naspers disclosed as related party transactions in the consolidated financial statements until Unbundling
- Thereafter reflected as a 3rd party

**Interest**
- Interest charge based on interest incurred by group entities on external borrowings
- Interest rate implicit in the lease, or group’s borrowing rate used to calculate PV of min lease payments
- Interest expense based on effective interest rate
- Interest income maximised through MCG cash pooling structure

**Equity**
- Other reserves include hedging, fair value and FX translation reserves
Explanation of organic metrics and growth rates

- Organic metrics (i.e. organic trading profit, costs and revenue) calculated after adjusting reported values for: (1) changes in FX rates and (2) M&A activity
- Compared to the prior period actual IFRS results to arrive at organic growth rates
- Assurance report provided by auditors in respect of this calculation

Adjustment 1: Changes in foreign exchange rates
- Calculated by translating the current period’s results at the prior period’s average FX rates (average of the monthly exchange rates for that period)

Average exchange rates used for translation, relative to ZAR\(^{(1)}\):

Adjustment 2: Changes in group composition (M&A)
- Adjustments for acquisitions or disposals of subsidiaries made in both current and prior year
- For mergers, adjustment includes a portion of the prior year results of the entity with which the merger takes place
- No M&A activity has impacted organic growth calculations for 1H FY20
